1 Brackets and bracket-like functions

You can specify a bracket size using $-1, \dots, 4$, where -1 uses `\left` and `\right`, 0 uses nothing, and positive numbers use increasingly large fixed sizes. The default behavior is 0 when in text mode and -1 when in display mode.

Description	Example	Text style	Display style
Regular brackets (parentheses)	<code>\rbra{\frac{x}{y}}</code>	$(\frac{x}{y})$	$\left(\frac{x}{y}\right)$
Curly brackets	<code>\cbra[2]{\frac{x}{y}}</code>	$\left\{\frac{x}{y}\right\}$	$\left\{\frac{x}{y}\right\}$
Square brackets	<code>\sbra[4]{\frac{x}{y}}</code>	$\left[\frac{x}{y}\right]$	$\left[\frac{x}{y}\right]$

Many other bracket-like, semantic commands are also available:

Description	Example	Text style	Display style
Absolute value	<code>\abs{\frac{x}{y}}</code>	$ \frac{x}{y} $	$\left \frac{x}{y}\right $
Set	<code>\set{\frac{x}{y}, \frac{y}{z}}</code>	$\{\frac{x}{y}, \frac{y}{z}\}$	$\left\{\frac{x}{y}, \frac{y}{z}\right\}$
Floor	<code>\floor{\frac{x}{y}}</code>	$\lfloor\frac{x}{y}\rfloor$	$\left\lfloor\frac{x}{y}\right\rfloor$
Ceiling	<code>\ceil{\frac{x}{y}}</code>	$\lceil\frac{x}{y}\rceil$	$\left\lceil\frac{x}{y}\right\rceil$
Norm	<code>\norm{\frac{x}{y}}</code>	$\ \frac{x}{y}\ $	$\left\ \frac{x}{y}\right\ $
Inner product	<code>\inner{\frac{x}{y}}{\frac{y}{z}}</code>	$\langle\frac{x}{y}, \frac{y}{z}\rangle$	$\left\langle\frac{x}{y}, \frac{y}{z}\right\rangle$
Cardinality	<code>\card{\whA}</code>	$ \hat{A} $	$\left \hat{A}\right $

Some examples of each size option:

	-1	0	1	2	3	4
<code>\abs{\frac{x}{y}}</code>	$ \frac{x}{y} $	$ \frac{x}{y} $	$ \frac{x}{y} $	$ \frac{x}{y} $	$ \frac{x}{y} $	$ \frac{x}{y} $
<code>\floor{\frac{x}{y}}</code>	$\lfloor\frac{x}{y}\rfloor$	$\lfloor\frac{x}{y}\rfloor$	$\lfloor\frac{x}{y}\rfloor$	$\lfloor\frac{x}{y}\rfloor$	$\lfloor\frac{x}{y}\rfloor$	$\lfloor\frac{x}{y}\rfloor$
<code>\norm{\frac{x}{y}}</code>	$\ \frac{x}{y}\ $	$\ \frac{x}{y}\ $	$\ \frac{x}{y}\ $	$\ \frac{x}{y}\ $	$\ \frac{x}{y}\ $	$\ \frac{x}{y}\ $

The norm and inner product commands also have versions with a subscript argument:

Description	Example	Text style	Display style
Norm with subscript	<code>\normsub{\frac{x}{y}}{2}</code>	$\ \frac{x}{y}\ _2$	$\left\ \frac{x}{y}\right\ _2$
Inner product with subscript	<code>\innersub{\frac{x}{y}}{z}{2}</code>	$\langle\frac{x}{y}, z\rangle_2$	$\left\langle\frac{x}{y}, z\right\rangle_2$
